Old Chinese and Friends: Advances in the Reconstruction of Old Chinese Phonology

Workshop (organized by Yunfan Lai and Johann-Mattis List)

April 26-27, 2018
Department of Linguistic and Cultural Evolution
Max Planck Institute for the Science of Human History
Jena

Outline

The reconstruction of the phonology of Old Chinese has greatly advanced during the last decades. As a result, reconstruction systems which were proposed independently by different scholars, such as Baxter and Sagart (2014), Starostin (1989), and Zhèngzhāng (2003) resemble each other much more than earlier reconstructions (Wáng 1980, Li 1971, Karlgren 1957). With the increased consensus among scholars, Old Chinese has also begun to resemble Tibete-Burman languages much closer, which has lead to an increased research and debate about the position of Chinese within the Sino-Tibetan (or Trans-Himalayan) language family (Behr 1999, Jacques 2015).

The goal of the workshop is to bring together experts on Sino-Tibetan linguistics, Ancient Chinese, Old Chinese reconstruction, and Chinese paleography to discuss future directions of research on Old Chinese phonology in the broader context of the genetic affiliation of Chinese as well as the history of the writing system with a special focus on newly excavated documents.

Call for Abstracts

We invite interested scholars to submit abstracts on Old Chinese phonology, Chinese paleography, or the position of Chinese within the Sino-Tibetan language family. Please state your affiliation and contact information in the email body text. To make it easier for us to sort emails with abstracts, we further ask you to add “[OCAF submission]” to the header of your email (including the brackets). Limited funding for travel will be available, but we cannot promise to be able to cover the funding of all participants. In case you need funding, we ask you to indicate this in the email accompanying your abstract. The deadline for sending abstracts is January 15.
